# CLINICAL DESCRIPTION

Orthodontic and orthognathic surgery treatment quality is extremely variable. How do we obtain consistently excellent results for our patients? This highly acclaimed clinical course defines excellence and how to achieve it. Protocols are given for all aspects of diagnosis and treatment which enable the practitioner to change his or her practice of orthodontics and orthognathic surgery.

## CLINICAL TOPICS

- Basic Concepts of Care
- Facial Planning
- Airway Diagnosis and FAB™ Treatment Planning\*
- Temporomandibular Planning
- Occlusal Planning
- Accuracy Planning
- Successful Orthodontics and Surgical Techniques
- 3D Dental, Skeletal and Facial Analysis

\* FAB™ Treatment Planning – The face, airway, and bite (FAB™) are inextricably linked in facial skeletal diagnosis and treatment planning. FAB™ represents the composite goal of excellent treatment – simultaneous correction of facial, airway, and bite abnormalities.

# 2010 COURSE ENDORSEMENTS

*Extremely well organized, current, showed excellent cases. Also – it was well appreciated the humble nature of these terrific surgeons in front of such a large group.*

Wanda Claro - Orthodontist

*Well organized, good presentation amazing knowledge, great staff. Wish more surgeons used this technique.*

Bahar Ghafour - Orthodontist

*The facial, TMJ, and occlusal examination portions can all be easily adapted to complete and comprehension examinations in the general dentist office.*

David S. Hancock – General Dentist

*I learned more at this course about orthognathic treatment planning than in 6 years of residency and more about orthodontics than ever before.*

Nish Shah – Oral Maxillofacial surgeon

*Dr. Arnett and Dr. Gunson explain step by step all orthodontist and orthognathic protocols – it's a dream!*

Alain Souchet – Orthodontist

*This was a very factual course with so much information I was amazed.*

Robert C. Lesniski – Oral Maxillofacial Surgeon

*An absolute necessity for all orthognathic surgeons-especially the beginning surgeon-for organizing their practice in a logical and evidence based manner.*

Jerald S. Pruner – Oral Maxillofacial Surgeon

*Again this course overcame my expectations. They change (for better) every year.*

Diderot Rodrigues Parreira – Oral Maxillofacial Surgeon

*We get a complete "cook book" on orthognathic surgery.*

Lucas G. Patrocinio – Ent/Cranio Facial Surgeon

*Perhaps the most informative course I ever attended. So much useful information that can be used to make better results in all my patients.*

Soeren Skov – Orthodontist

*Well organized, information that is backed up by good literature.*

Roger Kallal – Oral Maxillofacial Surgeon

*Wonderful combination of literature based research, clinical technique and hands-on.*

Katie Bales – Orthodontist

*Great organization, better understanding of treatment possibilities and exact treatment.*

U. Schwarz – Oral Maxillofacial Surgeon

*Dr. Arnett is extremely organized, no one has explained the surgery in this way.*

Josmar Briceno – Orthodontist

THANK YOU TO OUR EXHIBITORS:

## HANDS - ON DESCRIPTION

The hands-on workshop covers facial analysis, computerized cephalometric treatment planning, and articulator model surgery. A patient from Dr. Arnett's practice is studied. Each student will complete a facial analysis which will direct cephalometric treatment planning. Indicated cephalometric changes will then be used to guide articulated model surgery. Students' work will be compared to the patient's actual treatment plan and surgery.

## HANDS - ON TOPICS

- Records
- Facial Examination
- Computerized Soft Tissue Cephalometrics
- Computerized Cephalometrics Treatment Planning
- Mandibular First Model Block Surgery

## BIOGRAPHIES

### G. WILLIAM ARNETT, DDS, FACD

Dr. Arnett graduated with honors from the University of Southern California Dental School in 1972 and completed his oral and maxillofacial surgery residency at the University of California at Los Angeles. He practiced comprehensive oral surgery until 1985 when he limited his practice strictly to facial reconstruction and research.

As a lecturer and clinical instructor, Dr. Arnett trains both orthodontic and surgical residents. He is currently on staff as an Assistant Professor in the Department of Orthodontics at Loma Linda University; a Clinical Assistant Professor at University of Southern California; a Senior Lecturer in Oral and Maxillofacial Surgery at University of California at Los Angeles; a Clinical Professor in the Department of Oral and Maxillofacial surgery at the University of Texas Health Science Center at San Antonio; and a visiting professor at the Universidad del Desarrollo School of Dentistry in Santiago, Chile. Dr.

Arnett is a Diplomate of the American Board of Oral and Maxillofacial Surgery and has been honored as a Fellow of the American College of Dentists.

Recognized for his national and international lectures and articles, Dr. Arnett is considered to be pre-eminent in the field of orthognathic surgery. His two-part paper, *Facial Keys to Orthodontic Diagnosis and Treatment Planning*, received the prestigious B.F. and Helen E. Dewel Clinical Orthodontic Award for paper of the year by the American Association of Orthodontists. He co-authored a book with Dr. Richard McLaughlin titled *Facial and Dental Planning for Orthodontists and Oral Surgeons*.

### MICHAEL J. GUNSON, DDS, MD

Dr. Michael J. Gunson graduated from UCLA Dental School and continued on to receive his Medical Degree and Specialty Certificate in Oral and Maxillofacial Surgery from UCLA. Upon completion of his training, Dr. Gunson was invited to partner with Dr. G. William Arnett at the Center for Corrective Jaw Surgery in Santa Barbara, California. Since that time, his practice has been limited to facial reconstructive surgery, surgical correction of sleep apnea and research.

Dr. Gunson has lectured and published research on the surgical correction of OSA, the three dimensional airway changes associated with surgical correction, the medical treatment of mandibular condylar resorption, and the quantification of beauty.

Specializing in orthognathic surgery and research has enabled Drs. Gunson and Arnett to examine approximately 10,000 patients with cosmetic, functional, and OSA conditions. As a result, they have studied and improved their results while sharing information through publications and lectures.

## REGISTRATION

Please fill in and return the accompanying registration form with payment in order to secure a space for the course. Because seating is limited, we urge you to respond at your earliest convenience. Course confirmation will follow receipt of payment.

California continuing education credits: 44 units
