

# Course Reviews

- ❖ Great course. One of the best C.E. courses I've been to. A wealth of information and techniques that can help any team to improve!  
**Martin Aidelbaum** ▪ Oral & Maxillofacial Surgeon ▪ Surrey, British Columbia
- ❖ This course is a must for every orthognathic team!!  
**Ron H. Roth** ▪ Orthodontist ▪ San Francisco, CA
- ❖ I certainly found your diagnostic scheme most helpful and with your permission would like to use your communication materials in our orthognathic program here at USC, as I feel they set the standard to which all programs should aspire.  
**Peter M. Sinclair, Professor and Chairman** ▪ Department of Orthodontics, University of Southern California ▪ Los Angeles, CA
- ❖ The best orthognathic course ever; indispensable for orthodontists and surgeons.  
**John Stilp** ▪ Oral Surgeon ▪ Wausau, Wisconsin
- ❖ This course has given me a better way of diagnosing both my orthodontic and surgical cases. Dr. Arnett has pointed out details that are now fundamental in my treatment.  
**Renato Cocconi** ▪ Orthodontist ▪ Assistant Professor ▪ University of Milan ▪ Department of Orthodontics
- ❖ This was the most efficiently presented, most organized course I have attended. The computer-designed presentation provided step-by-step delivery of information, building from one item to the next. It was outstanding.  
**Darrell L. Havener Jr.**, ▪ Orthodontist ▪ Highlands Ranch, CO
- ❖ The approach to orthognathic surgery is superb, and by the time I was finished with the course, I had a very logical and sequential approach for evaluating and treating my orthognathic surgery patients.  
**Vincent L. Williams** ▪ Oral and Maxillofacial Surgeon ▪ Twin Falls, Idaho
- ❖ Your soft tissue facial analysis is a major advancement for orthodontics and oral surgery.  
**Robert Glenn** ▪ Orthodontist ▪ Lincoln, Nebraska
- ❖ The course added a much needed dimension to Orthognathic treatment planning with greater degrees of accuracy and logic.  
**Murray Fain** ▪ Oral & Maxillofacial Surgeon ▪ White Rock, British Columbia
- ❖ Thank you for your ability to rationally, succinctly and intelligently present the best information I have ever received on Orthognathic surgery in the 18 years since I have finished my residency.  
**Richard E. Scheetz, Jr.** ▪ Oral and Maxillofacial Surgeon ▪ Dublin, Ohio

- ❖ It is the first time I have seen a workable Orthognathic surgery planning system which is truly geared for facial esthetics as well as skeletal dental function “Harmony” (The Key Word!)  
**Patrick Kline ▪ Oral and Maxillofacial Surgeon ▪ Lone Tree, CO**
- ❖ One of the best courses I have taken. It brought me way up to date on the state of orthognathic surgery today. The cephalometrics was excellent!! The course made a lot of sense A-Z.  
**Joel Brodsky ▪ Orthodontist ▪ Lakewood, CA**
- ❖ Well organized and logical presentation of materials. It should raise the quality of Orthognathic surgery I deliver to a whole new level. It is exciting to know there is so much science behind treatment planning to improve esthetics and stability.  
**Andy Loetscher ▪ Oral and Maxillofacial Surgeon ▪ Norcross, Georgia**
- ❖ The concise, thorough approach takes the guess work out of the orthodontics and unpredictability out of the surgical results.  
**Amy James ▪ Orthodontist ▪ Haddonfield, New Jersey**
- ❖ A new way of thinking with a clear definition of the problem, but more importantly, a way to solve it!  
**Mark Orr ▪ Oral and Maxillofacial Surgeon ▪ Fort Collins, Colorado**
- ❖ The best surgical-orthodontic course available. When treating any patients that may need orthodontic/surgical treatment, whether surgeon or orthodontist; this course is a must!!  
**Thomas Utt ▪ Orthodontist ▪ Walla Walla, Washington**
- ❖ Great course, great information and well documented. Presented in a logical order with an incredibly well organized work book. The perspective of both orthodontist and surgeon was of great value. Our team came together to the meeting which is the only way to do it!  
**K. Michael Hayes ▪ Orthodontist ▪ Auburn, IN.**
- ❖ Traditional theory and techniques were convincingly challenged. My patients will benefit functionally and esthetically from the understanding of patient evaluation and treatment planning that this course has provided me.  
**Darrell Gotaas ▪ Oral and Maxillofacial Surgeon ▪ Alberta, Canada**
- ❖ This was the finest surgical orthodontic course I have ever attended. I have an entirely new perspective that will significantly change the way I evaluate and treat my patients.  
**David M. Lenhart ▪ Orthodontist ▪ Lambertville, MI**
- ❖ This course was filled with Diamonds. The course was so comprehensive, I came in with high expectations and they were exceeded.  
**George Maranon ▪ Orthodontist ▪ Tarzana, CA**

- ❖ This is a must do course for every orthodontist and oral surgeon who are involved with orthognathic surgery. I feel very fortunate to have gained this vital information.  
**L. Douglas Knight ▪ Orthodontist ▪ Louisville, KY**
- ❖ Dr. Arnett consciously incorporates the best teaching techniques to ensure that maximum learning takes place in an economy of time. To say the course is relevant, well organized and a good expenditure of the participants' time and money would be an understatement.  
**David L. Way ▪ Orthodontist ▪ Fort Collins, CO**
- ❖ A great approach to the team management of orthognathic surgery patients—logical and sequential.  
**Jeffrey S. Dean ▪ Oral Surgeon ▪ Pocatello, Idaho**
- ❖ I don't know how orthodontists and oral surgeons can successfully treat orthognathic patients today without using the concepts presented by Dr. Arnett in his course.  
**John C. Griffiths ▪ Orthodontist ▪ Las Vegas, Nevada**
- ❖ I think this is perhaps the finest post graduate education course I have taken—I only wish I took it 15 years ago.  
**Barry E. Booth ▪ Orthodontist ▪ Lockport, Illinois**
- ❖ A very practical approach to a complex problem.  
**Joseph Finelli ▪ Oral Surgeon ▪ Camillus, New York**
- ❖ I think every surgeon, orthodontist or restorative dentist who is serious about well integrated quality care should take this course. Absolutely essential information for the 21<sup>st</sup> century orthodontist and surgeon.  
**Jim Burgess ▪ Orthodontist ▪ Colorado Springs, CO**
- ❖ Organization and detail is outstanding—best course of this type I've seen. After 30 years I thought I was beyond this but picked up some nice "pearls".  
**Paul M. Thomas ▪ Orthodontist-Oral and Maxillofacial Surgeon ▪ Durham, NC**
- ❖ This course revealed us a need to re-evaluate our way to do things.  
**Juha Heino ▪ Orthodontist ▪ Jyvaskyla, Finland**
- ❖ Outstanding! Extremely well organized and delivered!  
**Paul Rigali ▪ Orthodontist ▪ Wallingford, CT**
- ❖ Dr. Arnett has made such a great job to collect all the data for the course and he was able to bring it to us very nicely.  
**Veikko Tuovinen ▪ Oral and Maxillofacial Surgeon ▪ Jyvaskyla, Finland**
- ❖ The information and techniques are exceptional.  
**David M. Lenhart ▪ Orthodontist ▪ Sylvania, OH**
- ❖ Excellent organization – made a difficult subject easy to understand.  
**Timothy Alford ▪ Orthodontist ▪ Anderson, IN**

- ❖ This program is very extensive. Dr. Arnett is amazing in sharing the information and answering questions; the staff is amazing in helping with any problem.  
**Menahem Firedman ▪ Orthodontist ▪ Jerusalem, Israel**
- ❖ Course is brilliantly thought out and the soft tissue analysis is presented in a way which is achievable and not a lot of lip service.  
**Thomas Rollins ▪ Orthodontist ▪ Jacksonville, FL**
- ❖ Revealed the mystery of Orthognathic planning and surgical technique in a friendly way.  
**Shirley Coz ▪ Orthodontist ▪ Wapping, London**
- ❖ This is the most thorough course not meant for the casual observer! It's must for all those that care.  
**Jeffrey McClendon ▪ General Dentist ▪ New York City, NY**
- ❖ Best Orthognathic course I have attended. Very organized and thorough. It's changed my entire approach to Orthognathic management.  
**Sivabalan Vasudavan ▪ Orthodontist ▪ Boston, MA**
- ❖ Excellent material and presentations. I have been to the course before and I always learn new information which is relevant for my practice.  
**Carlos Letelier ▪ Oral and Maxillofacial Surgeon ▪ Las Vegas, NV**
- ❖ Excellent analytic evaluation of traditional Orthognathic surgery and establishment of new principals for reconstructive facial surgery.  
**Saranjeev Lalh ▪ Oral and Maxillofacial Surgeon ▪ Edmonton, Canada**
- ❖ As an orthodontist, I learned not only ideal surgical diagnosis and planning but also better orthodontic diagnosis and treatment planning. This course was excellent.  
**Paul Helpard ▪ Orthodontist ▪ Courtenay, Canada**
- ❖ It's really amazing the quality of all items that surround the course and the achievement of the excellence of results [..M]akes us feel unique to have such an opportunity to participate.  
**Octavio Cintra ▪ Oral and Maxillofacial Surgeon ▪ Sao Paulo, Brazil**
- ❖ The information and evidence presented will empower any surgeon and orthodontist to make knowledgeable decision to esthetically enhance any patient.  
**Al Thresher ▪ Orthodontist ▪ Las Vegas, NV**
- ❖ The course changed my understanding of Orthognathic/orthodontic treatment and gave me the confidence for approaching surgical cases and the delivery of great results.  
**Cass Burrell ▪ Orthodontist ▪ Wallingford, CT**
- ❖ Well presented interesting perspective. Well supported and documented and definitely added to my surgical approach to Orthognathic. The new information Dr. Michael Gunson presented on OSA was enlightening!  
**Jeffrey Berkley ▪ Oral and Maxillofacial Surgeon ▪ West Haven, CT**

- ❖ The Arnett course is a 'pearl' among contemporary courses. Both orthodontic and surgical residencies would greatly benefit from incorporating the Arnett course in their curriculums.

**Dipak Chudasma ▪ Orthodontist, Professor Jacksonville University ▪ Jacksonville, FL**

- ❖ "I have taken this course four times in 10 years. The Arnett Course continues to lead the way towards excellence in patient care. Drs. Arnett and Gunson are setting the standard of care in the treatment of skeletal discrepancies, dysmorphic faces, degenerative temporomandibular joints and obstructive sleep apnea. They are at the forefront in the utilization of new technology and in the utilization of newer medications to improve patient care."

**David Way ▪ Orthodontist ▪ Fort Collins, CO**
